PROFESSIONAL EXPERIENCE

Booz Allen Hamilton || 1/2023-current

Software Developer, 1 | Remote

- Software Developer on a team entitled Self-Service, which is on a contract with Veteran's Affairs to assist in updating and maintaining certain sections of va.gov. The goal of this team is to build and maintain features used by thousands of users daily to ensure an easy and user friendly experience for Veteran's who are navigating their benefits online.
- Front end work using React, JavaScript, HTML, CSS, and the VA's component library.
- Back end work using Ruby on Rails with a Postgres database.
- Duties also included writing and updating unit tests, submitting and reviewing PRs in Github, and work tracking in Jira.
- Also worked on a training team for a short time called 4CodeLabs where we worked on an internal project using Angular, TypeScript, Java, Spring Boot, Postgres, and Docker.
- Both projects operated using Agile and Scrum Methodologies

Develop Carolina || 1/2023 - 7/2023

Software Developer Apprentice | Remote

- Participated in this highly immersive apprenticeship where I split my time as an apprentice as well as a jr. developer at Booz Allen Hamilton.
- Mondays and Fridays were dedicated to attending workshops, building a full stack project, and completing assignments as apart of Develop Carolina curriculum.
- Tuesdays, Wednesdays, and Thursdays were dedicated time to work in an Agile work environment at a real company as a developer, working on real internal projects.

Code+/Trust || 1/2022 - 5/2022

Software Developer Intern | Mt. Pleasant, SC

- Front-end development using HTML, CSS, Javascript, React
- CLI, Git, and Github.
- Agile and Scrum Methodologies

Self-Employed || 5/2010 - Present

Musician/Educator | Various, USA

- Served as a private instructor teaching percussion, piano, and bass guitar.
- Lead instructor of the Wednesday Night Jazz Combo at the Charleston Jazz Academy.
- Lead Instructor of The Music Battery, a 501c3 non-profit serving underserved communities in Charleston.
- Professional drummer and percussion for various bands, singer/songwriters, theater productions, etc.

RECENT PROJECTS

Rudi - A music education app designed for those looking to master drumming rudiments.

<https://github.com/jordanboardman/rudi-app-front-end> & <https://github.com/jordanboardman/rudi-app-back-end>

- *Tech Stack:* HTML, CSS, MaterialUI, JavaScript, React, Node, Express, PostgreSQL
- Worked in a group of 3 and worked in an Agile format.
- This project was used as my capstone project towards completion of the DigitalCrafts bootcamp. I primarily floated as a full stack developer between front end and back end work while two other team mates primarily focused on either front/back end. I also came up with the idea for the app and handled all project management.

Ripple - A donation app designed to help everyday people make a difference by donating what they can each month to various non-profits and Earth focused businesses.

<https://github.com/jordanboardman/devcarolina-fullstack> & https://github.com/Esther775/Donation_api

- *Tech Stack:* HTML, CSS, MaterialUI, JavaScript, React, Ruby, Rails, PostgreSQL
- Worked in a group of 2 and worked in an Agile format.
- This project was used as my capstone project towards completion of the Develop Carolina Apprenticeship. I focused on creating the front end and handling all tasks in React. This includes creating lots of custom components and making sure the front-end repo is set up and routed correctly. I also did most of the UI/UX design needed. Lastly, I came up with the idea for the app and handled all project management.

EDUCATION

DigitalCrafts - Remote | 8/2022-11/2022

Full time Web Development Program

- Full Stack Software Development program utilizing all skills listed below.
- One of the highest rated coding bootcamps on [Course Report](#).
- Accredited through the American Intercontinental University System.
- At DigitalCrafts, I built four separate projects, three in teams and one individually. I learned a lot about working in a team using Agile and what it truly takes to become a Junior Software Developer.

Los Angeles College of Music - Los Angeles, CA | 9/2008-5/2010

A.A. Degree | Music Performance | 3.7 GPA

- Full time program studying music performance and drums/percussion.

SKILLS & PROFICIENCIES

- HTML, CSS, Bootstrap, JavaScript/TypeScript, React, Angular, Ruby on Rails, Python, PostgreSQL, Sequelize, Express.js, Node.js, EJS, Docker, Unit Testing, Git, Chrome Developer Tools, CLI, RESTful APIs, CRUD, JSON, Postman, Agile Workflow, JIRA, Trello, Github
